Centre: ST. HYACINTHE, QUEBEC—mills of Goodyear Cotton Co., of Canada, Limited in which are produced belting and hose fabrics and Supertwist Cords for Goodyear Tires.

ANNUAL REPORT OF THE DIRECTORS

OF

The Goodyear Tire & Rubber Company
of Canada, Limited

New Toronto, February 1st, 1934.

To the Shareholders:—

Your Board of Directors submits a Consolidated Balance Sheet of THE GOODYEAR TIRE & RUBBER COMPANY OF CANADA, LIMITED and its subsidiary companies, certified by your Auditors, which sets forth the results of the operations for the year ended December 31st, 1933 and the financial position of the combined companies.

The operations of the combined companies have resulted in a profit of \$1,991,510.64 after charging all manufacturing, selling and administrative expenses and income taxes but before providing for depreciation; from this amount there has been set aside a reserve of \$614,034.05 for depreciation on buildings and equipment, leaving a net profit of \$1,377,476.59. This amount of net profit represents an increase of \$659,723.92 over the net profits of 1932.

A comparison of the market prices of rubber and cotton at December 31st, 1932 with those of December 31st, 1933 shows that the spot price of crude rubber has increased 178% and of basic raw cotton (that is, $\frac{7}{8}$ " Middling Upland) 70%. Notwithstanding this substantial increase in prices of our crude materials during the year, there were practically no increases made in the selling prices of our finished products. Your Companies were fortunate in entering the beginning of the fiscal year just closed with a large quantity of rubber and cotton at prices which were materially below the average prices for the year; the year's favorable results reflect this fact. The inventories as at December 31st, 1933 were taken at cost or market, whichever was lower. We might add that your Companies enter the new year with large quantities of cotton and rubber at much below the current market prices.

There is an item of accrued profits on export business amounting to approximately \$200,000.00 which is not included in this statement owing to the fact that the exact amount has not yet been definitely determined.

The outstanding Accounts Receivable have been carefully reviewed and reserves which are considered adequate have been established to meet all probable losses and liabilities.

Your Companies have maintained their consistent policy in regard to provision for depreciation. The accumulated reserve for depreciation is now \$6,238,692.57 leaving the net book value of the total investment in plants and buildings at 47% of cost. The manufacturing equipment of the rubber plants, including installation, stands on the books of the Company at a net value of 19.6% of cost.

Below is given a summary showing how the combined operating profits of the Companies, for the past year, have been applied:—

Dividends on 7% Preferred Stock	\$507,547.25	
Dividends on Common Stock	360,164.00	\$ 867,711.25
Purchase of Bonds of Goodyear Cotton Co. of Canada, Ltd.		582,500.00
Redemption of Preferred Shares		13,500.00
Expended for additions to plant and equipment (net)		229,648.07
Increase in Net Current Assets or Working Capital		211,338.44
Increase in Miscellaneous Investments		82,210.54
Increase in Deferred Charges		4,602.34
		<u>\$1,991,510.64</u>

Your attention is directed to the purchase, during the year, of Bonds of GOODYEAR COTTON CO. OF CANADA, LIMITED, of the par value of \$582,500.00 thus reducing the Bonds in the hands of the public to only \$769,000.00. This balance outstanding is being called for redemption as of March 1st, 1934.

The total working capital, after deducting all current liabilities and tax reserves, amounts to \$10,188,060.57. The cash on hand alone is approximately two and a half times the total current liabilities. The cash, call loans and Government Bonds aggregate \$6,943,614.79; this represents an increase of \$385,582.34 over the amount of these assets at the beginning of the year.

The usual Preferred dividends at the rate of 7% per annum, amounting to \$507,547.25 were paid on the Preferred stock and dividends at the rate of 60 cents a share for the first three quarters and \$1.00 per share for the last quarter, amounting to \$360,164.00 were disbursed to the holders of the Common shares.

The Companies' earned surplus increased during the year by \$509,765.34. The net earnings accruing on the Common stock amounted to \$869,929.34 which is equivalent to \$6.76 per share.

Whilst important economies have been effected in controllable expenses, we wish to call your attention to an item of uncontrollable expense, which is taxation. The total amount paid in various kinds of taxes in 1933 was equivalent to 11.37% of your net factory cost exclusive of taxes paid.

Statistics of unit sales of the Canadian Rubber Industry compiled by the Rubber Association show for the year 1933 a decrease of 10.2% in sales to dealers, an increase of 9% in sales to car manufacturers and an increase in export business of 24.55%.

The plant of Goodyear Cotton Co. of Canada, Limited, at St. Hyacinthe, Quebec, has operated at a high percentage of capacity during 1933. The production of the Cotton Company is at the highest peak in its history and it is proving an important factor in the business of the consolidated companies.

In the latter part of the year, a property was purchased in Montreal at 679 St. James Street West, which is situated adjacent to Victoria Square. This property is exceptionally well suited to our needs as a branch warehouse. The ground area consists of 7,245 sq. ft., the building contains approximately 35,000 sq. ft. of floor space and the rear of the building faces on Little St. Antoine Street, thus providing excellent receiving and shipping facilities.

Inasmuch as business conditions show signs of a gradual but sure improvement, we anticipate that in the year 1934 there will be an increase in the unit volume of sales of rubber products, not only in Canada but elsewhere. Your Company has not deviated from its policy of continually improving its products and with an increased demand for rubber goods, particularly tires, your Company should secure its full share of the available business in 1934.

Your Company has 3,778 shareholders of whom 3,524 reside in Canada. The shareholders have always shown an active and constructive interest in the Company's affairs and the sale of its products. We wish to take this opportunity of expressing to the shareholders our appreciation of their cooperation in furthering the interests of the Company and of the many letters received giving helpful criticisms and encouragement; also, we wish to thank the members of the organization, in Office, Plant and Field for their loyal and efficient services rendered throughout the year.

On behalf of the Board,

C. H. CARLISLE,
President.

ROYAL BANK BUILDING

TORONTO, CANADA

January 27th, 1934.

To the Shareholders of

THE GOODYEAR TIRE AND RUBBER COMPANY OF CANADA, LIMITED:

We have examined the books and accounts of The Goodyear Tire and Rubber Company of Canada, Limited and its subsidiary companies for the year ending December 31, 1933.

We have satisfied ourselves that all charges to Property Accounts are in respect of actual additions, and sufficient provision has been made for accruing depreciation. The stocks on hand have been taken and valued by the Companies at cost or market prices, whichever were lower; the bad debt reserve is considered sufficient to provide for all doubtful accounts; the bank balances and call loans were confirmed by certificates, and we have taken all reasonable precautions to satisfy ourselves that all liabilities as at December 31, 1933 are included in the Balance Sheet.

And we report that, in our opinion, the annexed Consolidated Balance Sheet is drawn up so as to show the true financial position of the Company and its subsidiaries as of that date and the results from the operations for the year ending December 31, 1933 according to the best of our information and the explanations given to us and as shown by the books of the Companies.
